Weather and chance of precipitation at 800m							
Time							
00:00	03:00	06:00	09:00	12:00	15:00	18:00	21:00
Heavy Rain	Heavy Rain	Cloudy	Light rain	Sunny intervals	Light rain	Heavy Rain	Light rain showers (night)
Precipitation probability							
90%	60%	20%	70%	10%	70%	80%	40%

Forecast for Tuesday 01 Nov 2022

Weather: Heavy rain will clear overnight, then a mostly dry, bright start, but some low cloud and patchy mist around and cloud will soon increase from west to bring a spell of showery rain. Drier and brighter by the afternoon with some sunshine breaking through. Becoming cloudier again through the afternoon with spells of showery rain developing and some of this will be heavy and perhaps thundery, but becoming drier in evening with some clear spells developing.

Chance of cloud-free hill tops above 800m: 10% in early hours, then generally 60%, but 30% for a time in the morning and again from mid-afternoon.

Low Cloud and visibility: Extensive cloud down to 300 or 400m overnight, but breaking up as rain clears. Scattered cloud at 400m through the day, but perhaps more extensive in heavy, showery rain later. Otherwise mostly broken cloud between 500 and 700m, but extensive above 500m late afternoon. Good visibility out of rain, though moderate or poor in places at first with mist and murky in heavier rain as lower cloud merges with cloud layers above and also poor in heavier rain at times beneath cloud.

Meteorologist's View

Rather wet and murky at times, especially on mid-level and upper slopes in late afternoon with very wet conditions underfoot and some navigational difficulties.

Forecast for Wednesday 02 Nov 2022

Weather: A mostly dry, bright start, but heavy, showery rain soon spreading from west. More prolonged heavy rain through the afternoon and very windy bringing challenging conditions. Rain clearing in the evening with a few showers following.

Maximum wind: SW 30mph at first, increasing 35-45 gust 60 mph by the afternoon, though 60 gust 75mph is possible on summits. Decreasing a little late afternoon then turning more westerly and decreasing 30-35 gust 45mph in evening.

Chance of cloud-free hill tops above 800m: 80% soon 10%

Low Cloud and visibility: Mainly scattered cloud above 800m at first, soon extensive cloud down to 600m in showery rain, but down to 400m for much of the time in the afternoon, especially over western slopes. Moderate or good visibility at first, but generally poor or very poor through the day with rain and extensive hill fog.

Temperature: **Valleys:** Plus 7 C rising to plus 10 C
At 800m: Plus 3 C
Freezing level: Around 1000m at first then rising, though falling to 1000m again later
